- 1x Fuel filter febi 40578
- 1x Oil filter febi 27799
- 2x Oil filter febi 39215

## Truck maintenance package

Commercial vehicles must function reliably to deliver their cargo on time. Therefore, regular maintenance is essential. Compared to cars, there are not only air, oil, and fuel filters in commercial vehicles, but often coolant filters or hydraulic filters as well. Additionally, it is often the case that not only one, but rather multiple oil filters or fuel filters are installed.

febi offers the ideal solution for fast, regular maintenance. So you do not have to order all filters individually, we have tailor-made maintenance packages in our product range for numerous commercial vehicles. The maintenance package febi 100337 for Renault Trucks Kerax, Premium and Magnum with DXI11 and DXI13 engines contains the required two fuel filters and three oil filters.
