

# febi 181381

To fit:

Renault Trucks D-Series, Midlum

Repl. no. 74 21 809 714

Volvo Trucks FL, FL3

Repl. no. 21809714

EN

## Absolutely reliable! Cabin tilt cylinders from febi

Hydraulic cabin tilt systems have proven their worth and are now the technical standard for European commercial vehicle manufacturers. They allow the cab to be tilted with relatively little effort to provide access to the engine.

As the cabin tilt system is rarely needed, it often does not receive the attention it needs. This can be annoying if it does not work in an emergency and access to the engine is denied. It can be seriously damaged by external environmental influences such as dirt and splash water as well as stone chips.

febi offers the 181381 tilt cylinder for current Renault Trucks and Volvo Trucks. In addition, the cab tilt pump suitable for the same vehicle application is available under febi number 27211.

febi offers not only this, but many other tilt cylinders and a wide range of replacement parts for cabin tilt systems.

Cab Tilt Pump **febi 27211**,  
to fit the Tilt Cylinder **febi 181381**
