TECHNICAL REPORT

Rocker cover gasket choice
in IVECO 2.3 diesel engines.
Part numbers 11096000 and
11121300

PURPOSE

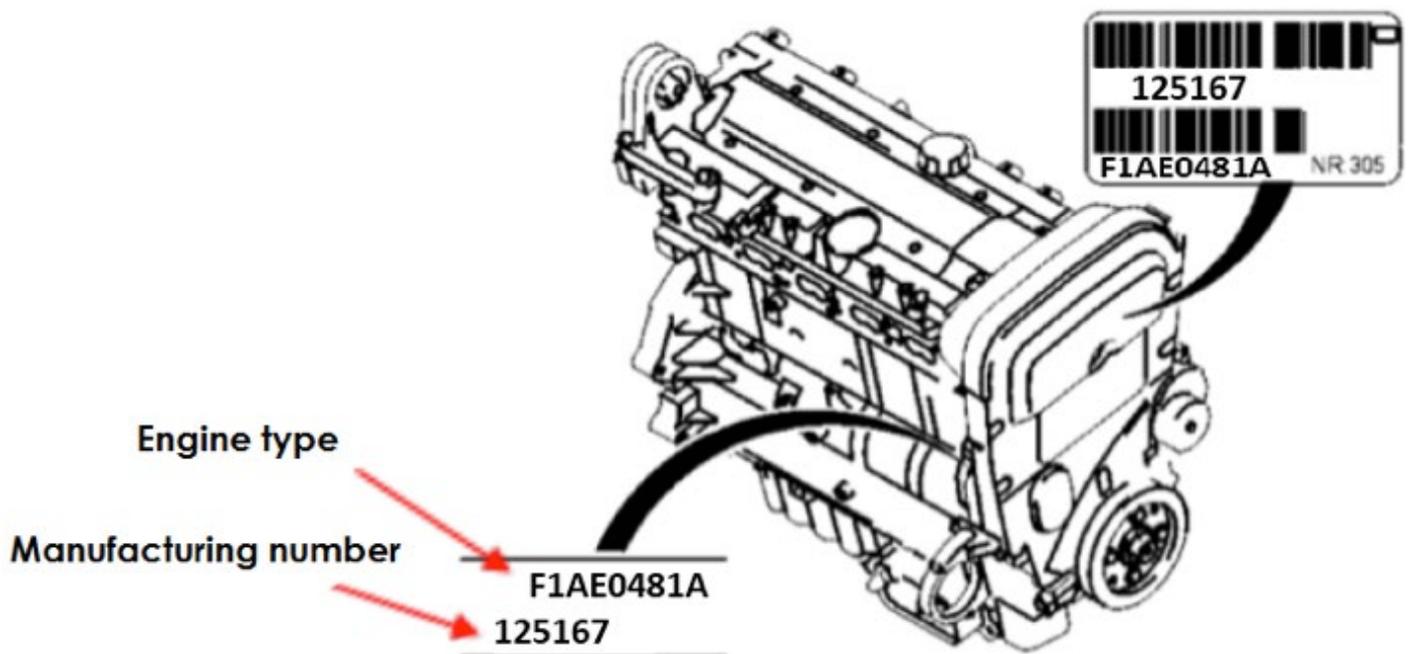

The aim of this technical report is to indicate the **main differences between the above mentioned IVECO gaskets** in order to help the customers of Ajusa choose the correct one depending on the engine number.

DESCRIPTION

2.3 diesel IVECO engines use two different types of rocker cover gaskets **depending on the engine number**. For that reason, Ajusa has two different rocker cover gaskets which differ from each other in their shape and material.

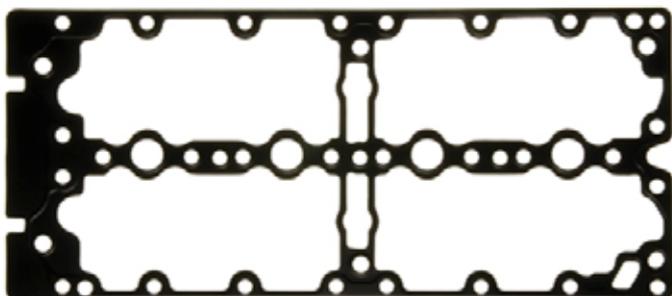

This rocker covers are mounted in models such as DAILY III, DAILY IV 16V, DAILY IV COMBI 16V, DAILY III 40C14, DAILY III COMBI 40C14, DAILY V y DAILY V COMBI.

The type of rocker cover mounted in each vehicle **depends on the cut defined by the engine manufacturing number**, which can be found in a label in the timing cover and in the rocker cover, or engraved behind the turbocharger.

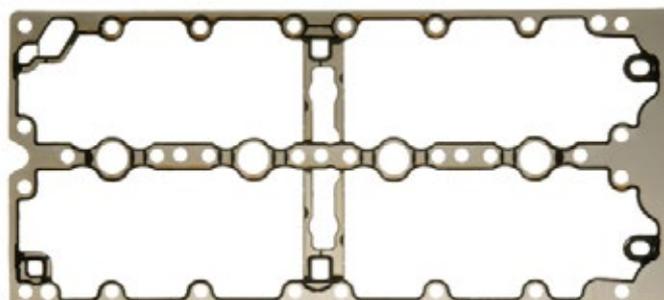

ENGINE TYPE	MODEL	MANUFACTURING NUMBER
		PART NUMBER
F1AE0481A	DAILY III	< 133428: 11096000
F1AE0481FA	DAILY IV 16V / DAILY IV COMBI 16V	
F1AE0481M	DAILY III 40C 14 / DAILY III COMBI 40C 14	
F1AE3481B	DAILY V / DAILY V COMBI	> 133429: 11121300
F1AE0481GA	DAILY IV 16V / DAILY IV COMBI 16V	

If this number is unknown, the gasket can also be chosen according to its material, shape and thickness:

Part number 11121300
 Rubber-covered steel
 Thickness: 0.35 mm

Part number 11096000
 Aluminium
 Thickness: 1.5 mm
