Installation of MANN-FILTER air filter C 27 009

MANN-FILTER will always reach a perfect design of products. Also for the air filter housing for 1.2L and 1.4L TSI engines in the VW Golf and VW Polo.

For design reasons of the air filter housing, the upper part of the housing is fastened to the lower part by four plastic clips and two screw connections. The screws are inserted into the filter from below, so that they cannot be seen.

View from below

View from side

Installation of the air filter element

1. Remove the hose (2) for the crankcase
2. Pull up the air filter to remove from the ball pins
3. Release the hose clips (3) and (4) pull out the air hoses
4. The face plate of the housing (1) can now be demounted

Reverse the procedure to reassemble.

What is impressive about the radial sealing concept of the oil filter element C 27 009 is its ingenuity and simply structure. Optimum radial compression of the seal is achieved through the design of the sealing contour.

Please observe the installation instructions of the vehicle manufacturer always!
