

M8Compact Fuse

The M8Compact fuses were developed in parallel to the new MaxiCompact fuses and they too offer an alternative to the standard Maxi fuses. This type of fuse is even available as an 80A version. Here too customers are impressed by the compact design, which offers

significant space savings. This is achieved for example by the lower self-heating level compared with the normal Maxi fuse. First developed for IVECO. Other FCA manufacturers will follow.

Fuse type: Melting Fuse **WxHxD:** 20,3 x 30,2 x 8 mm
DIN / ISO: 8820-3
 8820-10
