

Retrofit Tyre Pressure Control System

The retrofit kit for trailers is a universal retrofit system. Any trailer can be fitted with this system for rims larger than 13 inches. The sophisticated system not only includes six sensors and valves, but also a control unit,

charger cable and the LCD display. The current tyre pressure and temperature for up to three axles are always displayed. In the event of a deviation from the standard pressure, the device issues a visual and acoustic warning.

Gauge:	with illuminated LCD display	Number of sensors:	6
Tightening torque to:	4 Nm	Number of screws:	2
Material:	Cast Brass	only in connection with:	95990001
Info:	with battery with control unit with charge cable with add-on material with pressure sensor with integrated air temperature sensor for trailer with fastening material with cable with cigarette lighter plug with sensor with valves with seal ring with box nut with screw
